

## Tech Note: General Wildfire Knowledge Best Practice

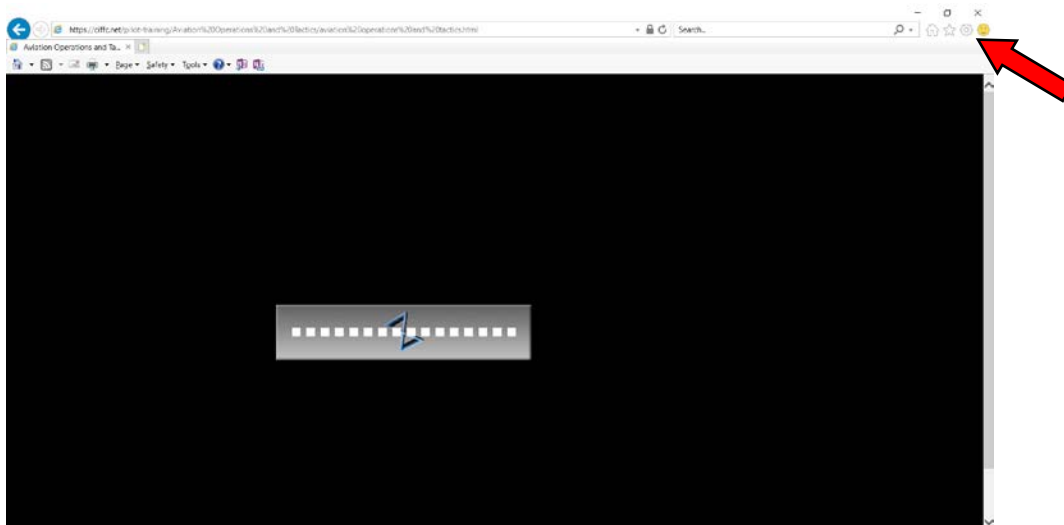

System requirements-Internet Explorer 11 with compatibility setting enabled. To enable compatibility settings click Tools> Compatibility View settings and add ciffc.net to the website list. Chrome and Firefox will not run videos in the Basics of Fire Behaviour Module. The modules are not optimized to run on mobile devices. Let us deal specifically with Internet Explorer 11. If you don't enable Compatibility View settings on Internet Explorer 11, none of the modules will launch.

A few mouse clicks from now all will be fine. Using the Internet Explorer 11 browser...

1. Click on one of the module links.

2. With one of the module links clicked open, click on the gear cog icon located upper righthand corner of your screen

## Tech Note: General Wildfire Knowledge Best Practice

3. From the list presented select Compatibility View settings
4. Click on the Add button and **ciffc.net** is now listed under the area Websites you've added to Compatibility View
5. To finish, click on the Close button
